## Objective

Experienced in using web development tools. Interested in a position where I can help support web application development.

## Education

**CUNY- College of Staten Island, Overall GPA 3.5**

**Anticipated Graduation: May 2022**

*Bachelor of Science in Computer Science*

### Relevant coursework:

Intermediate Programming, Computers and Programming, Data Structures, Object Oriented Software Design, Analysis of Algorithms, Intro to Database Systems, Operating Systems

## Technical Skills

**Programming:** JavaScript, C++, HTML, CSS, Java, MongoDB, MySQL

**Frameworks & Libraries:** React.js, Node.js, Express.js, GraphQL

**Technologies:** Xcode, Git/GitHub, VSCode, Eclipse

## Professional Experience

**Purpura Contracting and Landscaping, LLC- SI, NY, Assistant Manager**

**May 2016 - Present**

*Manage worksite projects and provide directional support*

- Collaborating with company owner on new home construction concepts
- Assisting with landscape excavation and design projects
- Leading daily operations including organizing staff schedules and project timelines

**HubSpire, Front-end Developer Intern**

**June 2021- Present**

*Hubspire is a results-driven intelligent solutions provider that utilize emerging technologies to advance and drive competitive advantage for their clients.*

- Learned and applied Custom Hooks, calling API's, reactive variables for client projects
- Used Material UI to input values into a text field within a table based on user information provided through the front-end
- Assigned to fix bugs on a website, using React.js, by changing the format and other front-end components.
- Allowed for access to APIs through a button-click that would fetch IDs from a Pokemon website to fill in profile information for various characters
- Trained in use of Quality Assurance, and Unit Testing to make sure that development was implemented properly and devoid of any bugs.

**NYC Department of Youth and Community Development, Head Counselor**

**July 2015 - August 2017**

*Responsible for daily logistics for large groups of children aged 7-9*

- Scope of responsibilities increased to include the onboarding of new counselors
- Proactively mentored junior camp counselors with less experience
- Facilitated communication between parents, counselors, and the organization

## Technical Experience

**Tech Talent Pipeline Residency Full Stack Development Bootcamp**

**January 2021 - February 2021**

*Participated in a full stack development bootcamp where topics on use of MongoDB, Express, React.js, Node.js, GraphQL were taught and then applied to a project using approach for creating a minimum viable product.*

- Developed a full-stack web application where users can search recipes as well as create an account to post recipes
- Designed and architected the front-end of our Recipe application using React.js
- Used Node.js for access to various APIs which retrieved user data from MongoDB
- Implemented and applied a light/dark mode feature using React.js
